

# Oynprith

## AT A GLANCE

Oynprith is the principal Droyne language, used in research, rituals, and trade. Designed by Yaskoydray as a research and collaboration language, every oytrip speaks it as a Droyne interlingua.

### Introduction

Oynprith is a synthetic noun-oriented language with a relatively free word order. Nouns fall into seven genders (and three “exceptions”); adjectives and verbs inflect to agree with their head noun. An odd characteristic of Oynprith is that all nouns are inherently plural (like Anglic ‘sheep’ or ‘fish’) and have no purely singular form. Even pronouns are plural only.

## Sounds of Oynprith

Initial consonants:

B	BR	D	DR	F	H	K	KR	L	M	N	P	PR
R	S	SS	ST	T	TH	TR	TS	TW	V			

Final consonants:

B	D	F	H	K	L	LB	LD	LK	LM	LN	LP	LS
LT	M	N	P	R	RD	RF	RK	RM	RN	RP	RS	RT
RV	S	SK	SS	ST	T	TH	TS	V	X			

Vowels (can be initial or final):

A	AY	E	I	O	OY	U	YA	YO	YU
---	----	---	---	---	----	---	----	----	----

## Morphology

Oynprith inflects for gender and certainty, and uses unbound words to represent aspect. Number is inherently plural, with no standard mechanism to represent the singular.

## Nouns

Oynprith nouns are sorted into seven genders and three “exceptions”. Usually, nouns of a given gender all have the same final vowel. This connection is so strong that newly minted nouns tend to drift from their category of meaning into a different category.

Gender	Final Vowel	Traditional or Typical Word Meanings
Leader	A	Sociology, Psychology, Law
Technician	AY	Engineering, Technology
Sport	E	Nature
Warrior	I	Military, History
Worker	O	Economics
Drone	OY	Medical, Design
Outcaste	U	Communication, Information, Art
Exception 1	YA	
Exception 2	YU	
Exception 3	YO	

The three exceptions (YA, YO, and YU) do not inflect verbs. All others impose their endings to their adjectives and verbs. For example, OSTAX “moon”, a Leader word, adds -AX to its adjectives and verbs.

Nouns default to plural, and pronouns are always plural. There are no singular pronouns.

## Indicatives

Three rather typical indicatives are used: “e” the/this, “a” that, and “o” that over there. They come immediately before their noun, e.g. “E OSTAX” in the phrase EPYOSSAXAL E OSTAX, “near the moons”.

## Pronouns

We	I
You (plural)	U
They	HOY
They (inanimate)	RUR
They (hypothetical)	SURS
+possessive	+YOT

## Compound Nouns

Descriptive verbs and nouns can be fused onto the front of nouns to form new words. For example, TROLATETH “orbital ship” derives from TROY “ship” and LATETH “orbital”. Similarly, ESKAYLOYT, the Droyne world of origin, derives from ESKAYTS “homeworld” and LOYT “lost” – and ESKAYTS itself in turn derives from ESSID “world” and KAYTS “home”.

## Conjunctions

Conjunctions create a group out of two or more nouns.

And/But	va	Or	hi
---------	----	----	----

## Verbs

### Certainty

Originally a research language, Oynprith is geared towards the reporting of results. Thus, besides agreeing with their subject noun, verbs finally inflect for certainty. After adding the subject noun gender-based suffix, add the certainty suffix. Certainty also can communicate other forms of grammatical mood, as noted:

-AL or YAL, “Metaphysical Certitude.” This denotes truth, complete certainty, and factual knowledge.

-YAR, “Probable.” This is typically used with informal indicative statements, as well as expressing technical probability.

-O, “No clue.” An absence of a certainty suffix means exactly that: the statement may or may not be true. This form is often used for speculation (X supposes...), hearsay (they say...), wishing (X wishes...), and imperatives (X orders...).

-YO, “Unlikely.” This form is used to express doubt, as well as express technical improbability.

-OLM or YOLM, “Not.” This denotes falsehood, no probability, and counterfactuals.

**Example** “That is the moon”. Using the verb THYO “to be” and the noun OSTAX “moon”:

THYOAL OSTAX.            “It is the moon.”

E THYEAL OSTAX.        “This is the moon.”

A THYAYAL OSTAX.       “That is the moon.”

AX THYOAL OSTAX.       “It is that moon.”

## Aspect

Unless otherwise specified, simple present (“IKRAY”) is *assumed* for sentences. If specificity is needed, time words may be used. They are formed with a perfective prefix plus a time suffix. These words inflect with their verbs.

PYA-	Perfect ‘done’
IK-	Non-perfect ‘does’
THYU-	Progressive ‘doing’
-RON	Past ‘did do’
-RAY	Present ‘does’
-KET	Future ‘will do’

## Asking Questions

TAS is the “what/who” question-form of MOS:

Tasay vastay ostax?	What or who is the lord of moons?
---------------------	-----------------------------------

Inflecting for certainty adds an indicative, probability-style mood to the question:

Tasayal vastay ostax?	Surely he IS the lord of moons?
Tasayyar vastay ostax?	Isn’t he the lord of moons?
Tasayyo vastay ostax?	He isn’t the lord of moons, is he?
Tasayolm vastay ostax?	Surely he is NOT the lord of moons?

## Prepositions and Adjectives

Prepositions and adjectives in Oynprith are just kinds of verbs, e.g. “it is-near home” or “is-green home”. As such, they also agree with noun gender and inflect for certainty.

Examples: The new moons. New = TOX. Moons = OSTAX.

## Oynprith at a Glance

New (maybe) moons = TOXAX OSTAX

New (certainty) moons = TOXAXAL OSTAX

Loudspeaker = ATHABRIYU = to be loud + voice.

## Genitives

Genitive verbs show possession and create noun phrases. Example "The lords of moons". Using the genitive verb MOY, noun VASTAY "lords", and noun OSTAX "moons":

MOS VASTAY OSTAX	"GEN lords moons"
MOSAY VASTAY OSTAX	"THEY ARE (maybe and maybe not; who knows?) Lords OF moons"
MOSAYAL VASTAY OSTAX	"THEY ARE ABSOLUTELY Lords OF moons"
MOSAYAR VASTAY OSTAX	"[Informal] they are lords of moons"

## Word Order

Agreement with nouns allows a (relatively) free word order, because verb and adjective suffixes indicate to which noun they refer.

[They are] lords of new moons = MOSAYAL VASTAY TOXAXAL OSTAX.

[They are] new lords of moons = MOSAYAL VASTAY TOXAYAL OSTAX.

[They are] moons of new lords = MOSAXAL VASTAY TOXAYAL OSTAX.

[They are] new lords of new moons = MOSAYAL VASTAY TOXAYAL TOXAXAL OSTAX.

## Relative Clause TOYN

Basically works like a colon :

## Emphatic PA

Mosot ostax PA iyot. The moons are **ours**!

Mosot PA ostax iyot. The **moons** are ours!

PA mosot ostax iyot. The moons **are** ours!

## Examples

Sketrolm I hyatyoiyal.

"We dislike Vagr." (Object-Subject-Verb)

## Oynprith at a Glance

Tsoyyar dodroypatyar ayaystal.

"Alpha-males suppose that Chirpers should be kept safe." (Subject-Verb-Object)

Tsuvetsayal moyayyo vastay ostax.

"The so-called lords of moons are absolutely displeased." (Verb-Subject)

Syalskolm pyaray nuhholmal mosolmal beyo mosoyal rissoyal nyabeh va vasse.

All-people are born free, in equal dignity and rights (in a very formal speech style).

## Ordinals

First	Skoay
Second	Skuro
Third	Skoyr
Fourth	Skithirk
Fifth	Skhekas
Sixth	Sketrip
